Ken,

Please pass the following message along to the records committee:

My name is Rob Crawley. I was on the Cedar Hills City Council between 2014 and 2017. I can attest to the fact that the information I forwarded to the city was given to me by city management and was downloaded from the Par 9 software that the city used for tracking activity on their golf course.

I believe that everyone would benefit if Cedar Hills would be more forthcoming with information regarding the golf course to residents that inquire about the activities of the golf course. Disseminating facts and information about the golf course will appease those that want to know the facts.

If there are ever any wrongdoings, it would bring those things to light so that they would be resolved more quickly. I see no downside to providing information to residents in an efficient and inexpensive manner.

Alternatively, when requests are dodged, delayed or provided at a high cost, this sows distrust with residents.

Rob Crawley  
Previous Cedar Hills City Council Member
